

Dear MUGEN POWER Enthusiast,

Ahh, springtime! The flooding rains, late blizzards and general lousy weather is gone! It's time to start attending to all the projects you've dreamt up for your Honda or Acura. A few modifications to the engine or suspension will make your car feel great all over again.

For that reason we are sending you a copy of the latest price list. This price list is meant to go with our Volume III catalog. If for any reason your catalog is missing, please call and we will gladly replace it. Please read through the price list carefully, it contains many new products. If you have any questions about these new products please call us. We really are excited about these products and love to talk about them!

A word about pricing. If you are comparing an old price list to the new price list you will undoubtedly note a large price increase in MUGEN products. This is due to two things. #1 **OUR ECONOMY**. All you have to do is pick up your local paper to see the **Japanese Yen** is the strongest it's ever been in US history. Because we import directly from Japan, the dollar simply doesn't go as far as it used to. #2 **JAPANESE INFLATION**. In Japan, because of their high inflation rates, it costs a lot more to make the same product as it did even one year ago. This had led to the first sizable price increase from MUGEN since 1988. We don't like it anymore than you! We have done everything we can to keep the prices as low as possible!

Enough rambling! Give us a call with your wish list and we will help you build the car of your dreams.

So--Get out there-- time's a-wasting!

Sincerely,

Scott A. Zellner

Sales Manager
